FOR INFORMATION

Minor Course Changes
Approved by the Undergraduate Curriculum Committees, November 2016-April 2017

Minor Modifications (Courses)

New Courses

Anatomy
ANA411H1  Anatomy in Application: Exercise & Biomechanics

Anthropology
ANT347H1  Metropolis: Global Cities
ANT362H1  Sports and Play
ANT386H1  Global Catholicism: Anthropological Approaches
ANT388H1  Anthropologists and Indigenous Peoples in North America
ANT437H1  Introduction to Virtual Anthropology

Biochemistry
BCH428H1  Genomics of microbial communities in human health and beyond

University College – Canadian Studies
CDN225H1  Asian Canadian Space & Time

Chemistry
CHM209H1  Chemistry of Molecular Gastronomy

Cinema Studies
CIN363H1  Ecocinema: The Nature of Film
CIN378Y0  Aspects of a National Cinema

Cognitive Science
COG403H1  Seminar in Cognitive Science
COG415H1  Cognitive Science in Practice

Criminology and Sociolegal Studies
CRI364H1  Indigenous Peoples & Criminal Justice
CRI422H1  Indigenous Law

Computer Science
CSC367H1  Parallel Programming
Drama
DRM202H1  Directing I
DRM454Y1  Advanced Production and Design

East Asian Studies
EAS274H1  Popular Culture in East Asia
EAS279H1  East Asian Ecocinema
EAS308H1  East Asia Seen in Maps, Ancient and Modern
EAS312H1  Art and Archaeology of Early China
EAS328H1  Science, Technology and Society in Modern China
EAS386H1  Culture of Nature in China
EAS422H1  Warring States Philosophy and Its Contexts

Economics
ECO101H1  Principles of Microeconomics
ECO102H1  Principles of Macroeconomics
ECO305H1  Economics of Accounting
ECO372H1  Applied Regression Analysis and Empirical Papers
ECO406H1  Developmental Macroeconomics
ECO423H1  Economics and Biosocial Data
ECO466H1  Empirical Macroeconomics and Policy
ECO499H1  Honours Essay in Applied Microeconomics

Environment
ENV261H1  Is the Internet Green?
ENV262H1  The Science of Energy in the Environment
ENV361H1  Social Media and Environmentalism
ENV362H1  Energy & Environment: Transitions in History
ENV461H1  The U of T Campus as a Living Lab of Sustainability
ENV462H1  Energy and Environment: Economics, Politics, and Sustainability

Art
FAH265H1  Monuments of the Islamic World
FAH390Y0  Studies Abroad in Spanish Art and Architecture
FAH405H1  Understanding Dionysos: The God of Wine, Theatre and the Afterlife

Finnish
FIN238H1  The Vikings
FIN270H1  Modern and Contemporary Finnish Architecture and Design

Geography
GGR481H1  Field Course in Environmental Geography

History
HIS221H1  African American History to 1865
HIS222H1  African American History from 1865 to the Present
HIS306H1  Islam and Muslims in the Balkans
HIS316H1  Competing Colonialism in Northeast China The Harbin Experiment
HIS327H1  Rome: The City in History
HIS339H1  History of Modern Israel
HIS340H1  The Ottoman Empire, 1800-1922
HIS358H1  Canadian History in 100 Objects
HIS393H1  Digital History
HIS396H1  Business and Society
HIS401Y1  History of the Cold War (formerly HIS401H1)
HIS435H1  Themes in Toronto History
HIS442H1  Jews and the Holocaust in the Soviet Union
HIS455Y1  Hacking History: Digital Projects Capstone Class
HIS475H1  Senior Thesis Seminar
HIS476Y1  Senior Thesis Seminar

Human Biology
HMB474H1  Dental Sciences

History and Philosophy of Science
HPS395Y1  Science, Development, and Innovation in Contemporary China

Impact Centre
IMC391H1  Exploring New Ventures
IMC392Y1  Exploring New Ventures

Innis College
INI106H1  Writing Literary Journalism: Telling the Stories of the City
INI201H1  Theories of Rhetoric
INI204H1  The Academic Writing Process
INI211H1  Introduction to Creative Writing
INI303H1  Digital Rhetoric
INI316H1  Developmental and Substantive Editing
INI342H1  Urban Studies Research Seminar I
INI414H1  Writing for Social Change
INI438H1  Advanced Urban Research Project
INI439H1  Cities and Mega-events: Place-making, Contestation and Urban Citizenship

VIC141Y1 Discovery and Revolution
VIC203Y1 Empire and Globalization

Minor Modifications (Programs)

Actuarial Science – Specialist
The first year economics courses were updated to reflect that core first year economics is now taught as half-courses (ECO101H1 and ECO102H1), and a computer science course was added to the program requirements.

**American Studies – Major**
Total credits to completion expanded to 7.0 FCEs to include new required course (USA200H1, previously recommended).

**Applied Statistics – Specialist**
Three new “disciplinary focus” options were added to the roster of such options for students in the specialist: Ecology, Evolutionary Biology, and Economics. Consultation with all relevant departments was conducted extensively, and these three disciplinary options fall in line in terms of number of credits, and the spread of credits (100-level through to upper-year) as modelled in the other disciplinary focuses already existing.

**Biochemistry – Specialist**
An introductory statistics course was added to second year course requirements, and the completion requirements that outlined chemistry courses (and areas of chemistry) and computer science courses that may be used to complete the program was streamlined.

**Cell and Systems Biology – New Focuses for Major and Specialist**

*Plant Genomics and Biotechnology*
*Stem Cells and Developmental Biology*
*Molecular Networks of the Cell*

Each of these focuses were introduced to help students navigate the breadth of concepts under the auspice of Cell & Molecular Biology, while also affording the opportunity for smaller communities of students to connect better with faculty – which is accomplished with the unique addition of learning community to each focus. This makes each focus one of limited enrolment; the aim initially is to admit roughly 10 students to each focus in a given year (30 students, across each year respectively). These students not only would be required to complete 2.5 FCEs from the cluster of focus-specific courses, but would be required to attend and contribute to the learning community that will focus on current research and career/graduate study navigation and options. Admission would be based on high marks in BIO130H or BIO230H, along with a statement of interest in the topic of the focus. The creation of these focuses addresses issues raised in the 2015 departmental self-study and external review, to help generate more student-faculty interaction, and to better guide students towards research opportunities. The focus on developmental biology will also help better serve students interesting in that area, instead of the current developmental biology specialist whose numbers are stagnating.

**Cognitive Science – Major (Arts)**
The first year linguistic course was revised to one half course (from a full credit course) and in balance, an additional 400-level half course was added. Other 400-level course options were expanded also.

**Computer Science – Minor, Major, Specialist**

**Computer Science – Focuses in Computer Systems, Human-computer Interaction, and Scientific Computing**
The enrolment requirements for the minor, major and specialist programs were all streamlined, removing some course options, but also increasing the minimum threshold mark from 60% to 70%. For the three focuses, course options towards completion were expanded, and/or, suggested related courses were expanded.

**Drama – Specialist**
Included new 200-level course as option in enrolment requirements, and clarified needed 200-level courses for program completion.

**Combined Degree Program in Education (Undergraduate and Graduate)**
Following a review by the Ontario College of Teachers, the two professional education courses taken by students in fourth year have been replaced with two elective courses offered in the Masters of Teaching, allowing for better choice and an even more smooth transition to the Masters program.

**Economic – Minor, Major, Specialist**
**Environmental Economics – Minor**
**Financial Economics – Specialist**
**Economics & Mathematics - Specialist**
All programs updated with new first year Economics course – now two half courses (ECO101H and ECO102H) instead of one full credit course (ECO100Y1).

**Human Geography - New Focuses for Major and Specialist**
**Urban Geography**
**Planning**
The Geography Department had offered an urban geography program of study up to the end of the end of 2008-09 when it was pulled into the general Human Geography program, but many students still focus on urban geography and cannot obtain any recognition for doing so, which this focus seeks to address. Students are also eager for an understanding of the ideas and policy behind planning in creating sustainable communities. A Focus in Planning allows students to explore a breadth of courses that engage planning questions, and respond to demand from students for more planning courses. Both Focuses require completion of specific 2.5 FCEs from a smaller list of geography courses in the process of completing a human geography major or specialist, and will afford those who complete the focus a broad understanding of the field and its intersection in other fields, advanced knowledge of core concepts and theories in urban geography and planning, and a
critical awareness and skill set reflecting contemporary research and texts. There are no expected resource implications.

History – Major
Minimum grade needed for needed 1.0 FCE in 100 History course reduced to 60%, and it must be a 100-level course, but program remains limited enrolment (actual cut-off varies year to year).

Jewish Studies – Minor
Courses for the minor (beyond 0.5 FCE in a required course) now may be taken from any of the areas of Jewish Studies.

Physiology – Minor
A broad list of course options to complete the minor (after course courses in biology and physiology) were expanded.

Sexual Diversity Studies – Minor, Major, Specialist
Each of the programs had some required courses added to core learning, but the elective options, formerly categorized across several course groups, were collapsed into a single course group, allowing more flexibility in elective options. In terms of the added core courses: in the minor, 0.5 credit is now mandated from a list of 300-level SDS courses; for the major and the specialist, a course in Queer of Colour and a course in Trans studies is now required along with previous core courses. (These two newly mandated courses are new courses for the program.)

Urban Studies – Minor, Major, Specialist
Each of the programs were revised to include a broader range of urban studies courses to count explicitly towards program completion, giving students a wider choice and better representing the current roster of course options. Courses available from other departments were also expanded.
